ABOUT ARUNACHAL PRADESH

Arunachal Pradesh, having attained full statehood in the Union of India in 1972 is now one of the most beautiful and vibrant states of India. The state enjoys benefits of prime location; being in the North-East of India, it has international borders with Bhutan on the west, People's Republic of China in the north and Myanmar in the east. It shares boundaries with Assam and Nagaland to the south. Its deep river valleys present exotic beauty of Mother Nature comparable to the paradise on the Earth. Arunachal Pradesh is particularly known for dawn-lit mountains.

Arunachal Pradesh has 24 districts comprised of Anjaw, Changlang, Dibang Valley, East Kameng, East Siang, Kra Daadi, Kurung Kumey, Lohit, Longding, Lower Dibang Valley, Lower Dibang Valley, Namsai, Papum Pare, Siang, Tawang, Tirap, Upper Siang, Upper Subansiri, West Kameng, West Siang, Kamle, Pakke-Kessang, Lepa Rada, Shi-Yomi District. Most of AP has great Himalayas as its crown. Moreover, its evergreen forest cover with several hundred different types of orchids presents it extreme serenity.

The climate of Arunachal Pradesh varies from hot humid in Sivalik range of Himalayas to very cold in upper ranges. The state experiences heavy rain fall during Monsoon. The state is inhabited by artistic people having rich cultural values and nationalist fervor. However, it is one of the most thinly populated states in the country.

The literacy rate in Arunachal Pradesh was about 65 percent as per 2011 senses but the state govt. has thereafter put particular focus on increasing GER to catch up with national average. In this context, higher education has received focused attention and new colleges and universities, both public and private, have been established.

As such agriculture drives the economy of Arunachal Pradesh; it comprises rice, ginger, maize, oilseeds, millet, wheat, pulses and sugarcane. Besides this, Arunachal Pradesh houses industries such as handloom handicrafts, rice mills, sawmills and fruit preservation.

ABOUT HIMALAYAN UNIVERSITY

Himalayan University is located at Jullang in the heart of Itanagar; the capital of Arunachal Pradesh. HU offers a wide range of programmes at different levels: under graduate, post graduate and doctorate, in addition to professional education. ONLINE EDUCATION

INDUSTRIAL COLLABORATION

Online Education

Online Education is also known as learning and consists of taking classes via the internet. More and more students take online classes because of the flexibility and convenience it provides. you can attend class sessions from the comfort of your home and complete assignments at almost any time of the day.

Online learning is a method of delivering educational information via the internet instead of in a physical classroom. There are many different applications for online learning, ranging in scope from simple downloadable content through to structured programmes that include assessment and award. Online learning has struggled to find acceptance in academic circles. It's difference from the norm of campus-based education has raised questions over the support offered to students and the merit of the award.

However, if you're looking to get ahead or even change your career path, or are looking for a formal qualification in an area of personal interest to you, an online education is a way of achieving this without sacrificing your lifestyle much as campus-based education would require you to.

Richer Class Discussion

The beauty of online discussion is that it creates a level playing field. No one person has a louder voice. The students with less confidence than their peers are typically more inclined to join a discussion when they're not physically standing in front of a room full of people.

Somewhat ironically, online students can communicate better and more frequently with their fellow students than a group of students sat in the same room. This is because when students are available online it's easier to approach others. Some online classes allocate marks according to your individual contributions because this is seen as important for the student's overall understanding of the subject.

Online Private Admission (For External Students)

Private candidate or External students can take the admission in any certificate/diploma or degree examination as an private mode without having pursued the prescribed regular courses of study in the University or in one of the institutions admitted to the privileges of the University provided they are otherwise eligible for admission under the regulation.

Transfer of Credit scheme (TOC)

The transfer or credit scheme is applicable only on those students who have not completed their course from any other recognised institute/university but they want to completed through HU as per rules provided. Credit transfer will be done on the bases of individual course and not on the bases of year to year courses.

Industrial Collaboration

Quality education cannot be achieved without practical training. The importance of vigorous training under actual circumstances and case studies can be well understood in present competitive environment where every enterprise is result oriented and demands output. Various enactments and committees has been laid and established by the Govt. from time to time accentuating the need of strong industry collaboration in India which can be achieved with simultaneous efforts of universities only.

In order to come up with those expectations and demands of unexpected corporate market, Himalayan University works in industrial collaboration while bridging the gap between students and job market. This linkage within the different sectors of the corporate world would assist to produce efficient technocrats to the market. The brand and top companies are always craving of efficient professionals where this topology of industrial collaboration that would help Himalayan University while catering the emerging needs of entrepreneurs. The university will be responsible for not only building and maintaining linkages with various enterprises but will also provides unique platform to check and improve the training curriculum of various fields of studies and thereby set new and improved standards of qualifying.

The main objectives of Himalayan University industrial collaboration are outlined as under:-

- Establishing relative contacts and linkages with industries/trades / academic faculties and students.
- To enable influential exchange of information between academicians/ universities and industries.
- To review from time to time the training curriculum under various fields to identify the emerging shortcomings and enable students to face challenges in complex environment.
- Campus placement system.
- Conducting seminars/ symposiums and general meet for raise interaction with corporate experts.

EDUCATIONAL TOUR

CAREER ADVANCEMENT CELL

Educational Tour

At Himalayan University, students of different courses experience different educational tours to varied destinations; that favors our students to learn in an informal environment, while building long-lasting relationships with other students and teachers. In last session; our Science students, Geography students and Library students had visited to Kolkata, Guwahati and to different districts of Arunachal Pradesh; depending on the course students are taking in HU, there are different kinds of field tours focusing on history, heritage, business, nature etc.

Career Advancement Cell

Career advisory is a department that works to synchronize the needs of corporate world and the students. It is an institutionalized system of advisory services designed to assist students in taking decision on career and educational guidance at different level of education. They understand the needs of the students and clarify their goals while providing precise career advisory. Under this our career experts and job counsellors would provide every information to the students through which they can easily achieve their career goals. How students enroll with their favourite subjects? How students will get easily accessed by employers? How students prepare as per their career aims? Below, we include career counselling and individual or group counselling focused on the choice of education and career choice of first job, changing jobs and return to work process.

Himalayan University career advisory services will help students in the below segments:

- Assistance in how well students can prepare their CV, Job application form, Covering letter and other Corporate / University documents.
- Bring best solution to the students about their study options and exploring career paths for the best suit.
- Guide students how to go through interviews of varied profiles.
- Our career advisory cell prepare with exploring and finding new jobs that can offer best to our students.
- Implementation practice "interview" and its subsequent feedback and analysis.
- Comprehensive preparation for the selection process, recommendations on behavior, stress management, nonverbal communication.
- Formulation of career plans whereby providing assignments and projects to the students.

ENTREPRENEURSHIP DEVELOPMENT CELL

Entrepreneurship Development Cell

- To act as central facility for providing various services including information on all aspects of enterprise building to budding entrepreneurs of Himalayan University.
- To create Entrepreneurial culture in Himalayan University and other institutions in the region.
- To inculcate a culture of new innovation driven entrepreneurship through student projects.
- To conduct orientation programmes for students and public to attract them into establishing their own enterprises.
- To organize training programmes on establishing and managing industrial units.
- To provide assistance to entrepreneurs in getting bank loans , selection of staff and workers and dealing with day to day problems in their business.

The University also has an Entrepreneurship Development cell for students who are interested in starting their own ventures. In today's business world business opportunities are not only created by external forces, but also by internal markets and entrepreneurial capabilities. The thrust mainly is to enable entrepreneurs to take advantage of market opportunities and to create the instinct of entrepreneurship amongst students. Entrepreneurship generates a large amount of employment and income options with initially small capital investments and little sophisticated and managerial & technical skills.

Many people believe that entrepreneurs are born and not made. This is partially true, for a few are born as entrepreneurs. But it is proven that with the right type of professional training and adequate motivation entrepreneurs can be developed. With this objective in mind, we organize a few entrepreneurship development programmes. We regularly invite successful entrepreneurs to share their experience with our students. The Entrepreneurship Development cell is responsible for such activities. The members of the cell include students of all streams who are interested to become entrepreneurs in future. The cell considers that its major role is to develop employment providers and not employment seekers.
